Date of Birth: 20-12-2000
Phone Number: +963 997 694 002

OBJECTIVE

Motivated Software Engineer seeking an opportunity to apply strong analytical and critical-thinking abilities in a dynamic work environment. Experienced in building reliable, scalable software and collaborating cross-functionally to deliver high-quality products. Skilled in UI/UX principles, translating user needs into intuitive interfaces, and improving usability through thoughtful design and problem-solving, while continuously developing technical and product skills.

TRAININGS

MERN Stack Developer, Aga Khan Foundation April 2025 - Present

- Enhanced teamwork and collaboration skills.
- Developed team leadership capabilities by guiding team members and supporting task delegation.
- Demonstrated solid time management by delivering features and resolving issues within strict deadlines and high-pressure environments.
- Strengthened project management competency by planning, tracking progress, and executing deliverables across the Software Development Life Cycle (SDLC).
- Applied analytical and critical-thinking skills to debug complex issues, optimize performance, and improve user experience.
- Improved problem-solving efficiency by designing scalable components using MongoDB, Express.js, React, and Node.js.
- Adapted quickly to evolving requirements and technologies, contributing to continuous improvement and innovation.

EDUCATION

Bachelor’s Degree in Informatics Engineering — Software Engineering Specialization Nov 2019 - May 2024

Al-Sham Private University, Damascus, Syria

Relevant Coursework: Software Engineering, Data Structures, Algorithms, Database Systems, Web Development, Operating Systems
